Extremity Medical Announces 1000 Implantation Milestone for HammerFiX™

April 3, 2015 – Parsippany, NJ - Extremity Medical, LLC announced that the HammerFiX™ IP Fusion Device has reached the 1000 implantation milestone prior to the one year anniversary of its release for sale in the US market.

The reported outcomes of this next generation product for hammertoe deformity correction, which is differentiated from its competitors in by both design and material, have been outstanding. The positive reports from HammerFiX™ use have lead to the rapid acceptance of this system by foot and ankle surgeons. Anthony Watson, MD, commented, "The versatility of the HammerFiX™ device has improved my ability to address toe deformities by providing the fixation necessary to achieve durable hammertoe correction without interfering with fixation of the MTP joint when necessary."

Extremity Medical, LLC is an orthopedic device company specializing in the development of next generation systems addressing unmet needs for the extremity surgeon. The company currently has 10 products released globally which include specialized fixation and advanced arthroplasty systems for the lower and distal upper extremities. The company's products are covered by an extensive portfolio of existing and pending patents.
