AOFAS Announcement: Extremity Medical Announces 510(k) Clearance for the Axis Charcot Fixation System

July 14th, 2017- Parsippany, NJ - Extremity Medical, LLC Extremity Medical announces the 510(k) clearance for the Axis Charcot Fixation System. This originative system is a comprehensive axial fixation system which will provide biomechanical advantages allowing for "superconstruct" type fixation for these challenging cases.

First cases with this innovative system are expected to take place in July.

Matt Lyons, Chairman and CEO of Extremity Medical commented, "Extremity Medical's goal has been to continue to develop innovative products that will significantly impact the extremity surgeon's ability to treat challenging patient conditions. The Axis Charcot Fixation System, along with the recent release of BioFuse (a next generation live-cell bone graft), provides significant advancements in the treatment of these patients."

Currently, Extremity Medical has 16 products released globally which include specialized fixation and advanced arthroplasty systems for the distal lower and upper extremities.
