Extremity Medical, LLC Announces 510(k) Clearance for APEX IP Fusion Device™

Extremity Medical, LLC announced that it has received 510(k) clearance for Apex IP Fusion System. The Apex System is used for intramedullary fixation of the interphalangeal joints in the hand. This unique system is based on the company's proprietary intraosseous fixation platform and provides an easy technique, reproducible fixed angles, stable fixation, in a minimal profile device.

Jamy Gannoe, CEO and Co-Founder of Extremity Medical commented "Apex delivers interphalangeal joint fusions to our hand and wrist capabilities. We now provide the surgeon a single supplier solution for the variety of fusions they perform. With the release of this product, our sales people now have the opportunity to sell into many indications and to develop frequent sales with each account."

The company will launch the product globally next month. Prior to Apex IP, Extremity Medical launched the XMCP™ and CarpalFiX™ products for many other types of digit and wrist fusions.

Extremity Medical, LLC is an orthopedic device company specializing in the development of next generation systems addressing unmet needs. The company currently has eight products released globally including specialized fixation and advanced arthroplasty systems for the distal upper and lower extremities. The company's products are covered by an extensive portfolio of existing and pending patents.
