ASSH Scientific Conference, Boston, MA

September 28th – 30th, 2022

EXTREMITY[®]
MEDICAL

ApeX[™]

Intramedullary Fusion Device

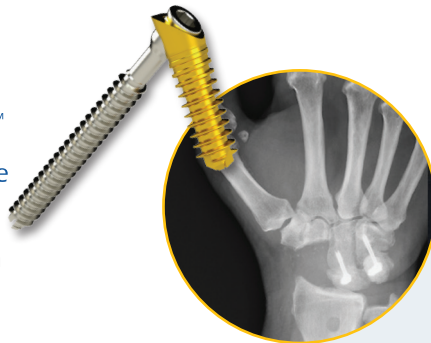

- Zero profile
- Stable intramedullary fixation
- Fixed reproducible angles (30° & 45°)

Carpal FiX[™]

Intraosseous Fusion Device

- Zero profile
- Uniform compression
- Morse taper lock

XMCP[™]

Fusion Fixation

- Zero profile
- Stable fixation
- Fixed reproducible angle (25°)

Biomechanically Engineered with patented X-Post technology delivering unmatched uniform compression, reinforced bone bridge, and optimized stability where it matters most.

Designed for better patient outcomes, especially in challenging patient conditions.

KinematX[®]

Total Wrist Arthroplasty

Delivering a smarter approach for total wrist.

Period.

- Designed for restoration of normal wrist biomechanics
- Midcarpal-based design
- Stable radial fixation

Tougher cases. Better outcomes.
Real change *starts here*[™]

Extremity Medical has developed the most advanced
extremity implant systems available – all built around the
patented game-changing X-Post technology that exponentially
increases the impact of companion plates and screws.

Tougher cases. Better outcomes.

Real change **starts** here™
