OMNI

Plating System

The PlantarFiX Post:

- 165% more compression vs. independent lag screw*
- No screw strip out
- Consistent plantar-side compression

Omni™ Stable AF

Ankle Fracture System

- 360 degrees anatomic plating coverage
- Unique plate geometries
- Low profile (1.3-1.5mm) and greater versatility

OMNI™ Mini

Plating System

- SlotLock™ provides increased peak and sustained compression*
- Variety of indication-specific and utility plates to fit your needs

OMNI™ Lapidus

Plating System

- SlotLock™ provides increased peak and sustained compression*
- All plates are anatomically contoured to the Lapidus joint

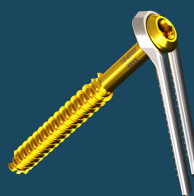

IO FiX 2.0

- Zero profile
- 2x greater compression vs. lag screw*
- Uniform compression across the joint

IO Freedom™

Fusion Fixation

The Freedom X-Post:

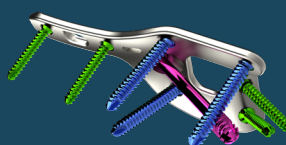

- Zero profile
- Greater compression and stability
- Flexibility for X-Post placement

THE CARTILAGINATOR®

- Engineered to control the depth of joint preparation
- Designed to decrease joint prep time
- Anatomically contoured to match the joint

AlignX

- Anterior and lateral approach plates
- Uniform axial compression

Axis Beam®

Charcot Fixation System

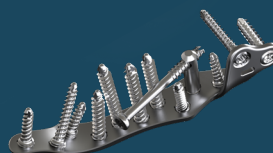

Superconstruct for Charcot Deformity

- 47x more fatigue life vs. leading competitor*
- 40% more purchase power with the X-Clip*

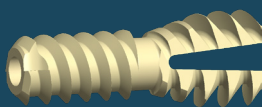

Axis Plate®

Charcot Fixation System

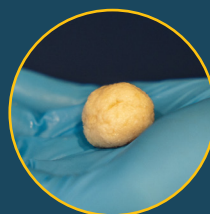

- Medial approach, plantar placement
- 165% more compression force vs. lag screw*
- 3 points of talar fixation
- No screw strip out

HammerFiX

- Cannulated PEEK implant
- Opposing threads for enhanced compression
- Stable IP fixation

NeoMTX™

- Cryopreserved, viable cell allograft
- Rapid thaw time (<10 min) with no decanting required
